

International Conference on AeroSpace Science and Technology 2026

Call for Papers

The committee of the International Conference on Aerospace Science and Technology (ICASST) 2026 invites researchers, professionals and students to present their scientific research work in the form of an oral or poster presentation.

General Information

ICASST is a scientific forum for the dissemination of basic research and/or technological development projects, which allows interaction between professionals, academics and industrialists, promoting scientific-technological collaborations in the aerospace field and related areas. The program includes oral and mural (poster) presentations, keynote lectures given by widely recognized national and international experts in their area, as well as courses/workshops. The conference will be held in a hybrid way, face-to-face/virtual.

ICASST 2026 venue will be Mexico City, Mexico. The specific address will be later disclosed, so keep in contact. The face-to-face modality will take place as long as sanitary conditions allow it.

The list of topics include, but are not limited to:

- Aerospace Exploration of Celestial Bodies
- AeroSpace Materials Science and Engineering
- Aerospace Science Education
- AeroSpace Structural and Propulsion Engineering
- AeroSpace Telecommunications and Data Processing
- Control Theory and Applications in AeroSpace systems
- Lean Satellite approach
- Remote Sensing and AeroSpace Instrumentation
- Systems Engineering for AeroSpace Systems
- Among others

Important dates

<i>Paper Submission:</i>	July 26, 2026
<i>Acceptance notification:</i>	August 07, 2026
<i>Camera-ready:</i>	August 21, 2026
<i>Notification of presentation's date and time:</i>	September 02, 2026
<i>Conference celebration:</i>	November 23-27, 2026

Guide for authors

Selected papers will be published in a Journal indexed in the Conference Proceedings Citation Index—Science (CPCI-S) (Clarivate, Web of Science) or in Scopus: IOP Journal of Physics: Conference Series. Manuscripts should be prepared as follows:

1.- Only the articles received through the virtual platform Morresier, on the dates herein established will be considered for peer-review. Authors should indicate if they prefer oral or poster sessions (however, the Committee reserves the right to assign the exposition modality if necessary). Authors must also disclose whether they should present virtually or in the face-to-face format.

2.- The received manuscripts will be subject to a double-blind review. Articles should be prepared according to the templates published in the webpage of ICASST 2026. The manuscripts sent for peer-review should not feature authors, affiliations, acknowledgements or any information that may disclose the identity of authors. However, authors should send their data through the virtual platform for registration purposes (and will not be given to anonymous reviewers).

3.- There is no limit in the length of manuscripts.

4.- The dictum of the submitted work will be informed through e-mail to the corresponding author. In the case of acceptance, authors should make the requested changes by the anonymous reviewers, and commit to sending the camera-ready version on the indicated date.

5.- In order to present the work in the conference (in virtual or hybrid mode) and appear in the conference proceedings, at least one of the authors must register, pay the authors fee and present the work at the event.

Some aspects to consider for the manuscripts are the following:

- The article must not have been previously published.
- Submitted manuscripts must be original. A maximum similarity percentage of 20% will be allowed, as long as it is not highly concentrated in certain paragraphs of the manuscript. Larger percentages of similarity will be allowed only at the discretion of the reviewers.
- Authors must ensure their permission to reproduce in electronic, and print form any copyright materials to be included in the manuscript¹ before sending them for peer-review.

A corresponding author must be designated, who must send the article via the virtual platform.

Submission²

By submitting a paper, the author assumes to accept all of the terms of the *Proceedings Publication Licence* provided by the Journal. For the avoidance of doubt, the submitting author shall be deemed to be agreeing to all of the terms of the *Proceedings Publication Licence* on their own behalf and on behalf of all their co-authors.

Such licence details may be found in the official ICASST 2026 web page <https://icasst.mx/>.

Submissions are received only through the virtual platform Morresier, linked at <https://icasst.mx/>.

Contact

For further information about the event, you can visit the official website,

<https://icasst.mx/>

or you can request information via email

contact@icasst.mx

¹ Failure to obtain such copyright permissions can result in significant delays of publication, and/or the withdrawal of the submitted manuscript from the published work. In the case of withdrawal for the cause of not obtaining copyright permissions, no refunding of the registration fee is applicable.

² The actual publisher may reserve the right to publish the Work at a later date if the complete Work is not delivered to the Publisher by the Submission Date, or if the Work is, in part or as a whole, not prepared as specified in the guidelines.
